Security Services

Our corporate, and occasionally our legal clients require uniformed security services. At IGI Security Services, we have professionally trained Uniformed Security Guards to assist you in securing your property, and your personnel.

Our officers have experience in building, construction site, retail, neighborhood and event security. We pride ourselves in accurate and useful reporting, allowing our client's to assess on a regular basis, both changes in the security environment and in the effectiveness of the Security Program.

We provide 24-hour emergency response for clients and their families and are committed to ensuring the protection of your property and your people.

Security specialists can provide client's with physical security reviews of plant, office and home, to assist client's in the assessment of current security measures and to recommend, where applicable, improvements. Security consultants work closely with investigative consultants to ensure that in addition to property, your information is also secure.

Our s are also trained to work in retail environments to provide a physical deterrent to shop theft.
